

Assignment 12

Searching the Natural Resources Canada (NRCan) Website for a Reserve Survey Plan

In this assignment, you will practice searching the NRCan database by looking for a survey plan for the High Bar First Nation. You will be looking for a survey taken of High Bar IR 1.

Instructions

1. To begin the assignment, print the instructions.
2. Open your web browser, type: <http://geoapps.nrcan.gc.ca/applications> into the address bar and press enter. Please note: this site is being upgraded and reorganized. Be prepared for changes at any time and contact the SC Course Coordinator if you encounter difficulties.
3. Click the link on this page titled "Canada Land Surveys," then scroll down the new page and select "Survey Plan Search."
4. In the box titled "Canada Lands" type "High Bar" and select High Bar 1A from the drop down menu.
5. Scroll down the page and click "Search."
6. You will be directed to another page with the results of your search for High Bar 1A.
7. You should now be looking at a page titled "Survey Plan Search Results," which contains a list of official surveys and field books produced for High Bar No. 1A.
8. Note the following elements of the plan search results:
 - a. Each survey record is labeled with a Canada Land Survey Record (CLSR) number. The last item in the list is "BC 326 CLSR BC"
 - b. On the right, next to the number, notice the other information provided, such as the name of the surveyor (GM Downton) and a general description of the subject of that particular survey plan (boundaries of High Bar reserves 1 and 2).
 - c. On the extreme right are the names of the two reserves involved with the survey record. They are linked to the CLSS "Map Browser"

application so that you can see where the reserve is situated if you wish.

9. Click on the link for BC326 CLSR BC. It will take you to a new page titled “Survey Plan Details” which will show you plan summary information, any related documents—in this case a fieldbook, FBBC 503 CLSR BC—and a box of file images which you may download. For BC 326 there is a TIF file available.
10. Click on the orange download icon for BC 326. In the small window that pops up, click on the option to “open,” and then click “ok.” It may take a second or two, but in a separate window, you should see a copy of the survey plan numbered BC 326 CLSR, titled “Plan of Lots 5289 & 5290, Lillooet District, Being High Bar Indian Reserves Nos. 1 & 2, Situated South of and Adjoining High Bar Ind. Res. No. 1.”
11. Save this file as a PDF to the My Saved Resources folder on your desktop as you will also use it in assignment 13. One way to save the file as a PDF is to print and choose “Adobe PDF” from the printer options.

Question

In the space provided below, list five types of information contained on the survey plan, and any questions you have about what you’re looking at.

Instructions:

1. To close the image, click on the red "X" at the top right corner of the window.
2. When you have completed this assignment, remember to save your work, close the assignment, and return to Unit 5-7 of the course.
